Play Through ABA: Summer Program

OVERVIEW

ACES TLC will offer four 2-week sessions of summer program to children with autism and other related developmental disabilities ages 3 to 5. The program will be designed to supplement the extended school year programming offered by the public school districts.

ACES TLC Play Through ABA Summer Program is an Applied Behavior Analytic Program that will address play, social, and communication skills through a play-based naturalistic teaching approach. Each three-hour session will involve social activities, structured play, and unstructured play. The objectives addressed across each context will be predetermined based on collaboration with each child's parents, school team, and other current providers. This may include generalization and maintenance of previously mastered skills, or skill acquisition programming.

ACES is equipped with the facility, trained and certified staff, transportation, and collaborative relationships with the school districts to provide a fun and productive experience for children with autism and related diagnoses.

SERVICES	DESCRIPTION
Individualized ABA programming based on Collaboration	Prior to the start of the child's program session(s) the ACES BCBA will collaborate with the child's family and school team to discuss which IEP objectives will be addressed during the session. Current programming will inform the design of the programming at program.
Play-based Learning	Objectives will be addressed in a naturalistic teaching format in the context of play and social activities.
SLP consultation	A part-time SLP will provide consultation and collaboration as needed.
Optional Parent Training Sessions	On-site parent training will be offered. Parents will be able to observe their child during a session and meet with the on-staff BCBA to discuss strategies.
Optional Transportation	Transportation to and from program may be arranged
End of session progress report	Data will be collected across the targeted goals and an end of session progress report will be provided.

PLAY THROUGH ABA: PROGRAM SESSIONS

Each session will be comprised of up to 5 children with ASD or a related diagnosis and at least one peer model.
